Fund Objective

The Fund aims to provide long term capital growth and some income by investing primarily in a diverse portfolio of smaller companies listed, or expected to be listed, on the Australian Securities Exchange.

Investment Style

Fairview is a core active investment manager that employs a disciplined, multi-faceted strategy for stock selection. This collaborative approach is research driven, combining high levels of company contact, detailed analysis, a robust peer review process and appropriate risk controls.

Investment Philosophy

Fairview's investment philosophy is based on the belief that opportunities for identifying mispriced securities are greatest within the smaller company segment of the market. This is primarily because many of these companies tend to be under researched and in some cases at an earlier stage of business maturity and accordingly have the potential to offer investors significant upside.

Suitably experienced and resourced active investment managers are well placed to identify such opportunities.
